

# Cyber Survivability for Local Government

## Zoom webinar technical tips

- Plug your device into a power source
- Connect your device directly into your internet connection instead of using wireless to avoid audio and video quality issues and interruptions
- You can submit questions for the speaker via the Q&A feature
- Please use the Zoom chat feature for any technical issues or questions

#### Disclaimer

**Disclaimer:** The information contained in this presentation is for general educational purposes only and is not intended to be legal advice. Please consult legal counsel for advice about specific questions.

#### Agenda

- Introductions
- Headlines
- What's in the infrastructure bill
- Using a framework for budgeting
- 10 things insurance companies want to see
- PISCES: free security monitoring
- Q/A with the panel

🕼 Critical Insight

#### Panelists

Mike Hamilton Critical Insight Founder

John Traeger City of Issaquah CIO

Jake Milstein Event Host, Critical Insight

#### **Public Sector Problems**

- · Hire & retaining talent
- · Significant compliance needs
- Cities & Counties can't be treated like companies. They hire, purchase, and run differently
- · Services & capitol purchases are difficult

#### **Public Sector Solutions**

- Cl provides gives you a security team
- CI assists with audit-readiness & training
- CI has dozens of years of public sector experience. Co-founder Mike Hamilton was City of Seattle CISO
- Cl is easy to buy. Contract vehicles & GPOs

# Glossary

- Phishing: A criminal's method for tricking you into giving up a password. Usually comes through email or social media.
- Ransomware: Should be called Cyber-Terrorism or Cyber-Extortion. A criminal locks up a network and/or files and then extorts the victim to unlock (note: don't trust criminals to keep their word)
- Business Email Compromise (BEC): When a criminal pretends to be a business you already know to steal money. Sometimes involving taking over one of your vendors.
- Multi-Factor Authentication (MFA or 2FA): More than just a password, something that proves in 2 ways that you are who you say you are. Generally, 2 of these: (1) something you know (2) something you have (3) something you are.

#### **News In Context**

#### Addressing the Cyber Storm: How States Can Make the Most of Modernization Funding

# Whole-of-State Cybersecurity Gains Ground in Government

Microsoft commits \$150 million to modernizing government cyber infrastructure

#### Infrastructure Legislation Could Improve State and Local Government Cybersecurity

Biggest cybersecurity issue is 'culture,' city CISOs say

뗹 Critical Insight

### Also, This

# Ransomware Operator: 'Start \*\*cking Up the U.S. Public Sector'

"In our difficult and troubled time when the US government is trying to fight us, I call on all partner programs to stop competing, unite and start \*\*cking up the US public sector, show this old man who is the boss here, who is the boss and will be on the Internet.

#### Critical Insight

#### The Infrastructure Bill

- Section 70612
- \$1.8B for states, local governments, Tribes
- Grants will be distributed by States
- A justification plan is required
- Grant funding duration is 2 years, renewable (annually, strangely)
- September 2023 deadline for plan submission
- · No one knows what the state will require
- There are exceptions

``(j) Limitations on Uses of Funds.-- ``(1) In general.--Any entity that receives funds from a grant under this section may not use the grant-- ``(A) to supplant State or local funds; ``(B) for any recipient cost-sharing contribution; ``(C) to pay a ransom; ``(D) for recreational or social purposes; or ``(E) for any purpose that does not address cybersecurity risks or cybersecurity threats on information systems owned or operated by, or on behalf of, the eligible entity that receives the grant or a local government within the jurisdiction of the eligible entity.

``(i) Review of Plans.-- ``(1) Review as condition of grant.-

```
``(A) In general.--Subject to paragraph (3), before
an eligible entity may receive a grant under this
section, the Secretary, acting through the
Director, shall-- ``(i) review the Cybersecurity
Plan of the eligible entity, including any revised
Cybersecurity Plans of the eligible entity; and
``(ii) determine that the Cybersecurity Plan
reviewed under clause (i) satisfies the
requirements under paragraph (2). ``(B) Duration of
determination.--In the case of a determination
under subparagraph (A)(ii) that a Cybersecurity
Plan satisfies the requirements under paragraph
(2), the determination shall be effective for the
2-year period beginning on the date of the
determination.
```

9

#### **Creating That Plan**

Determine whether outcomes are currently being met

If not, denote the disposition and corrective action required

Determine how the "fix" will be resourced: internally, use of professional services, capital purchase

#### **Governance and Management**

Programmatic task	Internal Resource Hours	Professional Services
Routine meetings, ad-hoc incident management, consulting project management, planning, recordkeeping	416	
Access authorization	410	
review	64	
Reporting to security governance committee	32	
Firewall rules and other routine inspections:	50	
Conducting rituals for vulnerability remediation and addressing corrective actions	100	
Risk Assessment:	40	
Tabletop exercise:	40	
Policy review:	40	
Penetration test		\$22,000
Awareness training		\$15,000
Risk Assessment		\$15,000
Annual cost estimate	782	\$52,000

<u> </u>					
Information Security Governance and Management Framework					
Weekly	Monthly	Quarterly	Annually		
Meetings (change control, infosec, governance, etc.)	Review vulnerability assessment results, assign disposition and delegate	Access authorization management reviews	Penetration test		
Incident Management	Firewall rules review	Conduct Security Governance Committee meeting	Risk Assessment		
Consulting project management	Recordkeeping (e.g. security testing results for products in use)	Perform 2 of the annual requirements	Security Awareness Training / Attestation		
Planning for upcoming monthly, <u>quarterly</u> or annual requirements	Corrective action board; infosec ritual	Report to Executive Security Governance Committee	Tabletop or functional security exercise		
		Conduct Vulnerability Assessment	Policy review		
			Service audits		

- Someone in the organization must be accountable for ensuring that required activities are occurring
- Annual requirements may be performed by professional services estimate costs
- Make sure that governance activities are included for communicating risks to executive management

#### What Insurance Companies Want

- 1. Follow the NIST Cybersecurity Framework
- 2. Engage External Expertise
- 3. Have Demonstrably Secure Backups
- 4. Have 24/7 Monitoring
- 5. Use Proactive Defense
- 6. Multi-Factor Authentication is a Must
- 7. Staff Cyber Security Awareness Training
- 8. Deploy Endpoint Protection
- 9. Vulnerability Management
- 10.Documented Incident Response Plans

A compendium of information provided by Aon/Stroz-Friedberg and communicating with our customers on their challenges

#### For Small Jurisdictions – PISCES

- Public Infrastructure Security Cyber Education System
- No cost for local governments sub-150 employees
- 2 or 3-year contract, renewable
- Metadata and IDS alerts extracted from the network no content
- Students at 5 universities evaluate and investigate alerts
- Oversight Analyst and Community Liaison for reporting
- Expanding into Colorado, then 2 other states

Jake@criticalinsight.com 206 718 9602 cell

Michael.Hamilton@criticalinsight.com

#### Walla Walla County, WA

"Everything comes down to relationships. As long as you guys have my back, I can do my real job, which is to support the citizens."

-Chad Goodhue, IT Manager

#### Wenatchee, WA

"The value to me is that 24x7 we have an extra set of eyes on our network activity to monitor the logs. We have artificial intelligence that goes through the logs, but the fact that we have real eyes around the clock is just invaluable to me." -Dale Cantrell, Director of Information Systems
