Computation used to train notable artificial intelligence systems

Computation is measured in total petaFLOP, which is 10^{15} floating-point operations¹.

Note: Computation is estimated based on published results in the AI literature and comes with some uncertainty. The authors expect the estimates to be correct within a factor of 2.

1. Floating-point operation: A floating-point operation (FLOP) is a type of computer operation. One FLOP is equivalent to one addition, subtraction, multiplication, or division of two decimal numbers.
